

Abdulrahman M. Almohaimeed

Cloud Architect

i@aalmohaimeed.com • (+966) 569-949-462 • AlSharqiya, Saudi Arabia • linkedin.com/in/amm1994/

Cloud Architect with expertise in IaC and Zero Trust environments. Proven ability to engineer scalable cloud topologies, automate CI/CD pipelines, and manage strict identity access controls. Proficient in programming and markup languages, including Python and HTML. Strong background in networking, security, DevOps, and cloud technologies. Effective team leader and passionate learner

EXPERIENCE

- | | | |
|-------------------|---|--------------|
| 01/2026 – Present | Mercor, AI Red Teamer
A specialized cybersecurity initiative focused on the adversarial testing, threat modeling, and security alignment of advanced Large Language Models. <ul style="list-style-type: none">• Executed targeted red team engagements to exploit security bypasses and uncover high-risk threat vectors across system outputs.• Authored technical vulnerability reports and audited system compliance to enforce mandatory operational security boundaries. | Saudi Arabia |
| 12/2019 – 01/2025 | Majid AlFuttiam, Field Engineer
The centralized Enterprise IT operations division responsible for maintaining secure, high-availability corporate infrastructure and technical services across a large-scale, multi-site organization. <ul style="list-style-type: none">• Engineered and supported highly available multi-site infrastructure, configuring Azure-based services and enforcing strict identity and access management policies.• Hardened system stability and maintained operational compliance through comprehensive patch management, infrastructure telemetry monitoring, and rigorous change management protocols. | Saudi Arabia |
| 01/2019 – 11/2019 | CTE, Network Administrator
A higher education technical environment focused on delivering and securing core data communications and local network services across collegiate facilities. <ul style="list-style-type: none">• Deployed and maintained physical routing and switching hardware while developing comprehensive technical documentation for the campus topology.• Governed local network integrity by managing endpoint security configurations and enforcing strict user access controls. | Saudi Arabia |

EDUCATION

- | | | |
|---------|---|----------------------|
| 05/2019 | Bachelor's of Engineering Technology,
College of Telecom and Electronics, Jeddah <ul style="list-style-type: none">• Bachelor's of Engineering Technology from the department of Engineering of Computer and Information Technology, in the field of Computer Network System. | Jeddah, Saudi Arabia |
| 12/2016 | Diploma, TVTC, Dammam <ul style="list-style-type: none">• Diploma in Information Technology from the department of Computer Science. | Dammam, Saudi Arabia |

SKILLS

Cloud Architecture & Infrastructure: Microsoft Azure, Terraform, Azure App Service, Serverless Architecture, Multi-Site Enterprise Topologies.

Cloud Security & Identity: Zero Trust Architecture, Microsoft Entra ID (IAM), Role-Based Access Control (RBAC), Principle of Least Privilege (PoLP).

Networking & Edge Defense: Cloudflare (DNS/CDN/SSL), CNAME Management, TCP/IP, Advanced Routing & Switching, NSG.

Automation & Scripting: GitHub Actions, CI/CD, Python, PowerShell.

Offensive Security & AI: AI Red Teaming, Adversarial Threat Modeling, LLM Vulnerability Analysis, Prompt Injection.

Databases & Web: MySQL, Azure Cosmos DB (NoSQL), SQL, Node.js, HTML/CSS.

LANGUAGES

Arabic: Native

English: Professional

CERTIFICATIONS

Microsoft Certified Azure Administrator Associate

CompTIA Security+

Cisco CCNA

Microsoft Certified Azure Fundamentals

Google Cybersecurity Professional

Saudi Council of Engineers (SCE) Registered Engineer

PROJECTS

Azure Zero Trust Infrastructure & Automated Web Application Deployment,
Independent Architecture Project

Secure, high-availability Azure ecosystem utilizing IaC for automated provisioning and Zero Trust identity governance. Demonstrates a modern DevOps lifecycle integrating automated CI/CD pipelines, DNS/Domain management, and serverless data persistence.

- **IaC:** Architected production-grade environments via **Terraform**, managing **DNS records** and cloud resources through secure remote state locking.
- **Zero Trust:** Enforced **PoLP** via **Microsoft Entra ID**, segregating Control and Data Plane permissions for all infrastructure identities.
- **CI/CD:** Engineered automated workflows using **GitHub Actions** for zero-downtime releases and immutable infrastructure updates.
- **DNS & Edge Security:** Managed **domain topology** and perimeter defense via **Cloudflare**, implementing CNAME flattening, apex resolution, and strict SSL/TLS.
- **Data Layer:** Deployed **Node.js** with serverless **Cosmos DB** for scalable telemetry and backend data management.
